

## Digital welding log for the metal industry - also for Pharma.

For those who need safe, fast and easy preparation of welding documentation, which also includes supports GMP requirements for Pharma.

SOCWeld is a fully digital, web-based software system that supports multiple users simultaneously.

### Benefits for you:

- One-screen user interface, where all information for your welding is stored. For example: WPSs, drawings, pictures, welding and material certificates, NDT test results.
- At the top is a table where the welding log is automatically generated.
- A "canvas" where you retrieve images, isometries and drawings from structures to be welded and applied via the "drag & drop" welding points directly to the drawing.
- Easy sign from Welder, QA and NDT people, who just have to make a few clicks, then name, certificate, time and date, comment and photo recorded at each welding point.

## Additional benefits for you:

- Prepare up to 100% of your log before the welder has started welding.
- This ensures that you are upfront when preparing your welding log.
- It also helps to optimize your project's cash flow.
- External access and ongoing approval from the customer and NDT.
- No documentation must be repeatedly sent back and forth to be approved by the customer.
- Complete overview of status / how far you are in your welding project / what is missing.

### Overview:

Click on a row for an overview of the weld images.

All welders  Numbers and Pct  Percentages  Numbers  Show inspection requirements

Section	Weld Image	Weld Points	Weld done	Visual	Endoscopy
211	9	121	100%	100%	11.6%
212	5	70	100%	100%	11.4%
213	37	278	100%	100%	12.2%
214	21	306	100%	100%	11.8%
<b>Total</b>	<b>72</b>	<b>775</b>	<b>100%</b>	<b>100%</b>	<b>11.9%</b>

The table shows the number of succesful Inspections. The number of "Not OK" Inspections are shown in red brackets [].

 **SOCWeld** © 2019 - Stage One Computing - Electronic GxP Weld Log. Version: 1.0.0.27384

- Both you and your customer have an overview of the status of the welding project.
- Minimize errors as only the right components, materials certificates, WPSs and similar documents related to the project can be selected when they fit together.
- Incredibly easy to use - no installation or expensive license required, just a web browser.
- Ensures consistent digital quality PDF Welding Log Report.
- Only minimum training in using the application is necessary.
